

# CELLULAR laboratories®

## BRIGHT, REVITALIZED AND REJUVENATED SKIN

Anti-aging skincare starts from the inside out. Cellular Laboratories® is a revolutionary anti-aging skincare line to support your skin on the cellular level, not just mask the signs of aging. Cellular Laboratories is designed using powerful, clinically tested and proven ingredients to help you look as young as you feel. Cellular Laboratories has a product for every need, from cleansing and purifying the skin to toning, renewing, protecting and hydrating. While other anti-aging skincare lines only focus on hydrating the skin, Cellular Laboratories goes beyond hydration, giving you results you can see and feel. Before you try anything else, try a system that will actually turn back the clock for your skin. In any skincare regimen, the order of products is dependent on the texture of the product — apply the lightest-textured products first and end with the heaviest. Apply treatments using a light patting motion, ensuring the entire face has been covered.

## CELLULAR LABORATORIES DAILY SKINCARE REGIMEN

*For best results, utilize the following regimen daily.*

### STEP 1 | CLEANSE ☀️🌙

Cleanse with **1 Cellular Laboratories De-Aging Facial Cleanser** (a.m. and p.m.). This botanical-rich, foaming cleanser soothes stressed skin and fights signs of aging by promoting the regeneration of healthy skin cells for a firmer, smoother complexion.

### STEP 2 | TONE ☀️🌙

Tone skin using the **2 Cellular Laboratories De-Aging Toner** (a.m. and p.m.). This toner rids skin of any excess dirt or oils, allowing skin to breathe and generate the proper collagen, elastin and moisture needed for healthy, radiant, youthful-looking skin.

### STEP 3 | TREAT ☀️ or 🌙

Apply **3 Cellular Laboratories Re-Birth Serum** (a.m. or p.m.). Revive your skin with this advanced serum that uses nanotechnology to help enhance skin penetration. Reduces the appearance of fine lines and wrinkles and brightens skin while helping to protect against the effects of pollution.

### STEP 4-5 | MOISTURIZE ☀️🌙

Apply **4 Cellular Laboratories De-Aging Crème** (p.m.), a multifunctional approach to intensive skin brightening and anti-aging therapy. This cream contains technologically advanced ingredients to address facial lines, wrinkles, uneven complexion, skin tone and dryness. Then apply **5 Cellular Laboratories De-Aging Eye Crème** to help pamper the most delicate skin on your face — your eyes — to ensure a vibrant, rested appearance (a.m. and p.m.).

### DETOXIFY ☀️ or 🌙

One to two times a week, apply **6 Cellular Laboratories De-Aging Lifting Facial Masque** after Step 2, Tone (a.m. or p.m.). This anti-aging sheet masque helps to reduce the appearance of fine lines, promote normal circulation and soften skin. Also infused with Matrixyl® 3000, which supports normal collagen production for firmer, healthier skin.

### PROTECT ☀️

Protect the face and body with the **7 Cellular Laboratories De-Aging Sunscreen Broad Spectrum SPF 50+** (a.m. & throughout the day). This comprehensive blend of active sunscreen ingredients helps protect against UVA and UVB rays while conditioning skin with antioxidants like vitamin E and green tea extract to maintain a youthful, vibrant glow for your face and body.
