

TIMELESS PRESCRIPTION®

AGE DEFYING SKINCARE

ADVANCED & ANTI-AGING SKINCARE

Timeless Prescription® goes beyond basic skincare to offer advanced anti-aging to meet all your skincare needs.

As we age, sun exposure, environmental factors and hormonal changes weaken our skin's defenses, leading to a number of unwanted effects, including fine lines and wrinkles, decreased skin thickness, uneven skin tone and texture, and skin dehydration. While other brands only address general skincare concerns, Timeless Prescription tackles specific problems that come about due to accelerated aging. With ingredients like collagen, grape seed extract and pine bark extract, Timeless Prescription products help give your skin a younger and more vibrant look. Nourish, revitalize and renew your skin with Timeless Prescription!

TIMELESS PRESCRIPTION DAILY SKINCARE REGIMEN

For best results, utilize the following regimen daily.

STEP 1 | CLEANSE ☀️🌙

Cleanse with **1 Timeless Prescription Facial Exfoliating Cleanser** (a.m. and p.m.). This fragrance-free and pH-balancing cleanser effectively removes makeup and excess oil. It gently exfoliates using salicylic acid to remove dead skin cells and unclog pores for clearer, smoother skin.

STEP 2 | TONE ☀️🌙

Next, apply **2 Timeless Prescription MDI Firming Activator** (a.m. and p.m.). Tone skin with this formula packed with active ingredients that work synergistically to counteract the signs of aging. Promotes firmness and elasticity for skin that looks gorgeous and healthy.

STEP 3 | MOISTURIZE ☀️🌙

Apply **3 Timeless Prescription Face Firming Moisturizer with MDI Complex** (a.m. and p.m.), an advanced, moisturizing formula that incorporates multiple vitamins and botanical antioxidants to neutralize free radicals and help protect skin. MDI Complex protects the skin while minimizing the appearance of fine lines and supporting skin elasticity.

DETOXIFY ☀️ or 🌙

Apply the **4 Timeless Prescription Advanced Hydroxy Face Peel and Neutralizer** one to two times a week after cleansing, in place of your toner. This two-step process removes dead skin cells and provides an antioxidant defense that leaves skin looking smoother, younger and healthier. The peel combines powerful alpha and beta hydroxy acids with vitamins A, C and E, and herbal extracts, to exfoliate and rejuvenate the skin. Green tea extract and chamomile in the antioxidant-packed neutralizer soothe the skin after the peel.
